

CONNECT DRIVE UPLOAD

Fully automated data transfer
with VDO Link

VDO

VDO Link – the smart solution for real-time use of vehicle and driver data from the tachograph. This Plug & Play telematics solution saves you time and money and increases your efficiency. Data is automatically transferred from the tachograph to the VDO Cloud and, in combination with our VDO Fleet Services, you can effortlessly comply with legal requirements and gain valuable insights to manage your fleet effectively.

PLUG & PLAY

Save valuable time and effort – simply connect VDO Link to your tachograph, register and start using.

TRACK & TRACE

Track your drivers' driving and resting times, vehicle availability and location in real time – perfect for route planning.

AUTOMATIC DATA DOWNLOAD

Automated downloads of legally required tachograph and driver card data ensure compliance, secure archiving on VDO Fleet servers and easy access for audits.

EASY INTEGRATION INTO THIRD-PARTY SYSTEMS

Thanks to its Plug & Play solution, VDO Link is the ideal telematics device for easily integrating tachograph data into third-party systems for further processing and offering new services.

THE VDO LINK – THE BASIS FOR MORE*

Effortless connectivity: The VDO Link connects directly to the digital and smart tachograph** and is immediately online. No additional workshop visits or extra hardware required.

Reliability: Thanks to direct data transmission from the DTCO® front interface, vehicle and driver data is transferred to the VDO Cloud via a secure mobile connection.

Convenience: With VDO Link and VDO Fleet Tachograph Management, the legal requirements for storing, archiving and deleting mass storage data are automatically met.

Clarity: Real-time data allows you to track vehicles, drivers and their availability on a single platform and to set useful geofencing areas.

Make the most of your data for perfect visibility and increased efficiency.

COST-EFFECTIVE, SECURE AND FLEXIBLE

Flexible data usage: The VDO Cloud offers an API interface for transmitting all data to third-party systems if needed.

Secure cloud solution: Data transmission and storage complies with all EU data protection and security requirements.

Cost-effective alternative: VDO Link is an affordable alternative to complex and expensive telematics hardware and installation.

Flexible application: Leased or rental vehicles can be easily integrated into VDO Fleet or other fleet management systems thanks to our Plug & Play telematics.

Modular system: The services described in VDO Fleet, such as real-time driver availability data, vehicle data including position, Remote Download, evaluation and archiving of tachograph data, are available for individual vehicles.

Optimize your fleet management now with VDO Link and VDO Fleet! Simplify the planning of personnel and vehicles. Flexibly integrate different fleet types and remain fully compliant – all with minimal effort!
