DLK Pro TIS-Compact S

Intelligent archiving and evaluation

The DLK Pro TIS-Compact S is a practical solution for downloading, archiving and managing data, all in one device; because with the TIS-Compact, digital tachograph and driver card data can be downloaded quickly and securely, transferred to a PC and then visualised, archived and printed out using the integrated PC application.

Digital tachograph data is downloaded via the serial 6-PIN interface, which is compatible with all digital tachographs. The integrated chip card reader enables data download straight from the driver card. The high-speed USB interface then transfers the data quickly and securely to the computer.

The mobile Key in mobile phone format offers maximum comfort and easy handling, not least thanks to its integrated 2.2" TFT touch screen, which provides a quick view of the download files on site. The screen also displays reminders of due downloads, information on the charge level of the rechargeable battery and memory capacity.

And the DLK Pro TIS-Compact S possesses outstanding data security, thanks to its integrated SD card reader; a backup copy can be created at any time on an external SD card.

Since the DLK Pro TIS-Compact S does not require a power supply for downloading tachograph data, or for transferring data to a PC, it is always ready for use in the vehicle and on the computer. The integrated rechargeable battery is only required for downloading driver card data and displaying data on the screen.

Using the associated software, data can be visualised, archived and printed out at the PC. This gives you e.g. an overview of driving time, working time and rest periods at any time. Speed values for the last 24 hours of driving time only can also be displayed.

The DLK Pro TIS-Compact S is ideal for self-driving entrepreneurs and small fleets with up to 5 vehicles and 10 drivers.

DLK Pro TIS-Compact S

Intelligent archiving and evaluation

Advantages
- Simply intelligent: one Key for downloading, archiving and managing data
- Fulfilment of the legal download obligation for fleet operators and workshops
- Fulfilment of the legal archiving obligation for vehicle fleets
- Downloading of mass memory and driver card data to all digital tachographs (compatible with 12V and 24V devices)
- Optional data download straight from the driver card
- Handy 2.2" TFT touch screen for evaluating vehicle and driver activities and displaying the download status, the charge level of the rechargeable battery and the currently available memory capacity
- Additional LED for displaying the download status, plus an acoustic signal when the download is complete
- Reminder for required downloads
- Signature checking of the download files
- Simple archiving of mass memory and driver card data on separate system disks, with graphic support
- Visualisation of the data at the PC, e.g. driver activities, (driving time, working time and rest periods) and speed values for the last 24 hours of driving time
- Exporting of data to other PC applications
- Printouts of driver card and mass memory data
- No external power supply required for digital tachograph data downloads and evaluation at the PC
- Memory for around 6,000 quarterly downloads
- 2 GB memory
- Fast data transport from the digital tachograph to the PC thanks to the high-speed USB interface
- User-configurable start screen
- 29 languages available (Italian and Dutch must be registered)
- One Key for up to 5 vehicles and 10 drivers

Package contents
- DLK Pro TIS-Compact S
- Comprehensive software for Key configuration, data visualisation, evaluation and archiving on the Key
- USB extension cable
- Quick Start Booklet (printed) and Operating Instructions (digital on the Key)
- Wrist loop

System requirements
- Windows 10, Windows 8 oder Windows 7,
- Free USB port on the PC

Accessories
- DLK Pro Licence Card
- DLK Pro Power Box
- DLK Pro Neoprene Case
