

VDO Fleet Services

Maximum compliance, maximum efficiency –
your fleet in the best hands

fleet.vdo.com

Whether data management, archiving, scheduling
or working hours: with VDO Fleet you keep all
obligations and risks under control.

Lawful handling of data

Tachograph and driver card data are downloaded in
time and stored or deleted in accordance with the law.

Compliance with information obligations made easier

VDO Fleet supports you with the regular instruction
and documentation for your drivers.

Real-time overview of the infringement situation

Full transparency of current violations in the fleet,
avoidance of limit violations in accordance with ERRU
and integration of national working time regulations.

Control of financial risks

Quantification and avoidance of potential
fines at any time.

Legally compliant management of international transportation

Support for the consideration of new EU regulations
of the EU Mobility Package I in cross-border traffic.

Real-time transparency for your fleet

Vehicle position including information on remaining
driving times for more efficient planning of the shift
and week.

VDO

VDO FLEET TACHOGRAPH MANAGEMENT

With VDO Fleet Tachograph Management you not only meet the legal requirements effortlessly, but also optimize your entire fleet management. Let the system do the work, so you can concentrate on the essentials: the smooth operation of your fleet.

Resource optimization and decision-making

- / Effortless management of locations and groups.
- / Carrying out simple comparisons, e.g. for fines and for better decision-making.

Personnel planning made easy

- / Get detailed information on the remaining driving time.
- / The dashboard automatically reports driver problems for targeted training courses.

Data archiving and provision

- / Completeness and correctness checks for compulsory block and certificates.
- / Data is provided in the expected format for authorities, also for on-site inspections.
- / Secure cloud storage enables easy data retrieval.

Managing cross-border transports

Meets the requirements of the EU Mobility Package I with automatic recording of the country of departure and destination.

VDO LINK – PLUG & PLAY TELEMATICS

VDO Link is the clever Plug & Play telematics solution for fleets of all sizes. Just plug it into the digital tachograph and register – that's it.

- / Secure remote download and archiving of tachograph data within the legal deadlines.
- / Availability of drivers in real time.
- / Reports on drivers and violations.
- / Track & Trace.
- / Ideal for rental, leased and subcontractor vehicles.

VDO FLEET REMOTE DOWNLOAD

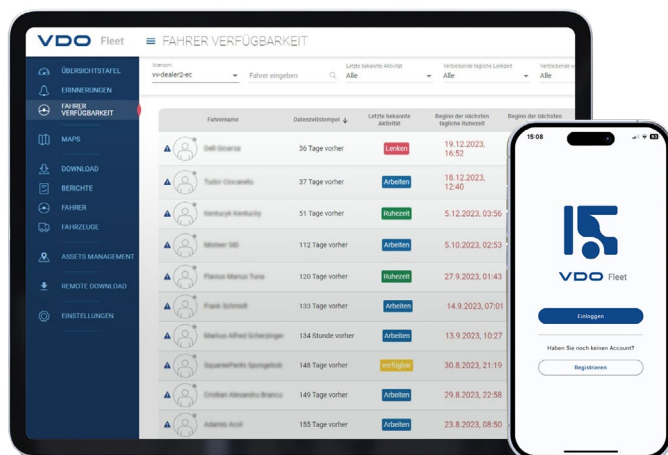

Remote DL 4G is a powerful, LTE-based telematics unit for the fully automated and wireless download of tachograph data. Used together with the VDO Fleet Tachograph Management Download Service, it enables reliable and timely access to driver and vehicle data.

Increased efficiency

- / Time savings thanks to automated download processes.
- / Use the reminder function for a better overview of regulations and their compliance as well as downloads – on a weekly basis, for instance.

Compliance and reliability

- / Ensure the timely replacement of company cards with overview lists with expiry dates.
- / Company card hosting for smooth data recording, even when driving at night, and constant data access.

VDO Fleet Remote Download
and VDO Fleet App

VDO FLEET LIVE SERVICES

This service gives you a view of driver status, vehicle positions and driving time reserves, almost in real time. Ideal for more efficient deployment planning and legally compliant scheduling.

With **VDO Fleet Maps** you can make the real-time dispatch and monitoring of your vehicles and drivers much easier. Always stay informed about driver availability, track the exact position and current direction of travel of the vehicles. Get precise location information and an insight into drivers' remaining driving times.

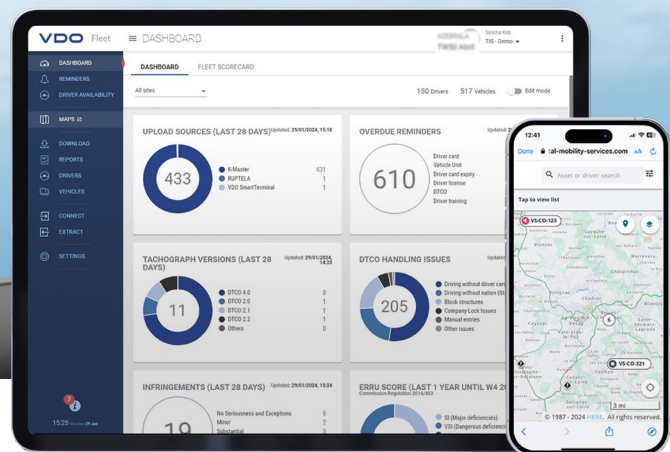

With the help of geofencing functions the dispatch department can optimize routes, minimize idle times and empty journeys, proactively inform customers about the ETA and react more quickly to deviations.

VDO Fleet Maps

Clearly designed Track & Trace system

- / Easy operation.
- / Support of the mobile map view also via smartphone (VDO Fleet App).
- / All vehicles are displayed almost in real time.
- / For targeted vehicle monitoring, a tracking function makes it possible to keep the vehicle in the center of the maps.

Precise position information

- / Kilometer value and remaining driving time are displayed exactly.
- / Easier planning of driver availability.
- / Transparency as to whether the transport can be carried out on time and in compliance with the law.

Reduce costs

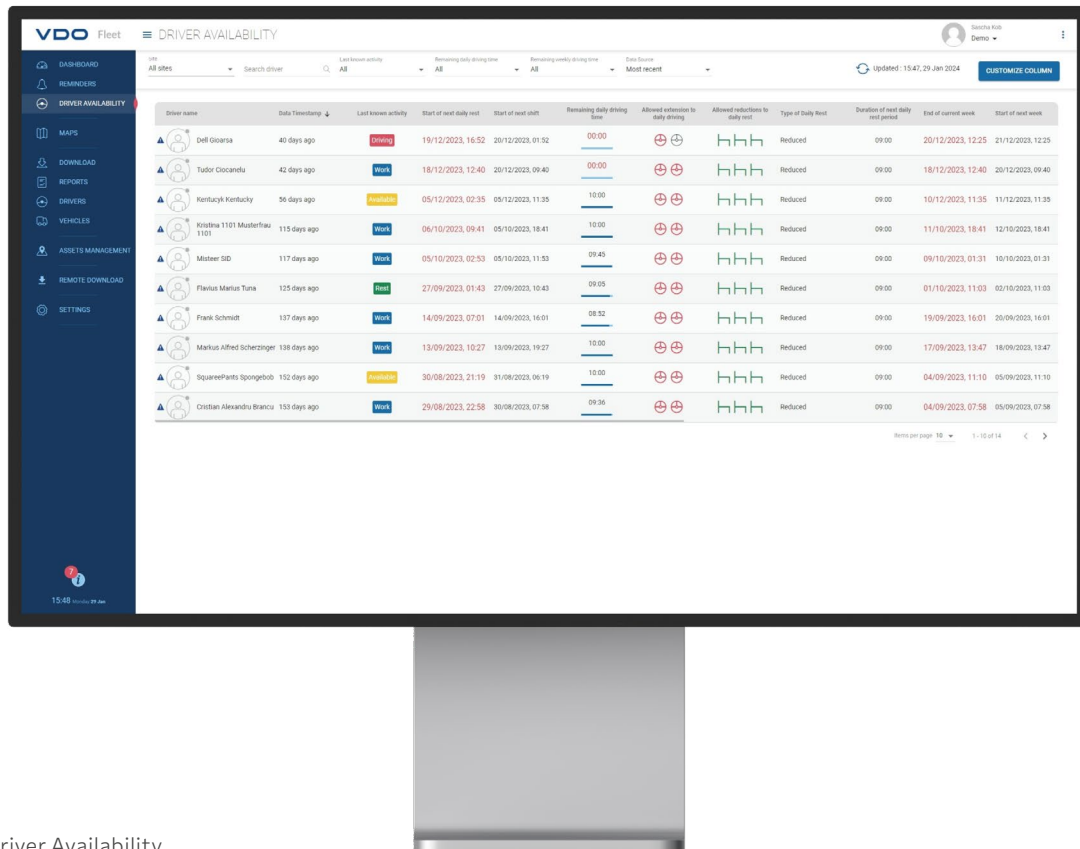

- / Avoid unnecessary fuel consumption with an engine idling overview.
- / Optimal billing of the kilometers driven by the driver when delivering goods.

VDO FLEET DRIVER AVAILABILITY

Easy-to-understand and customizable information about the availability of all drivers is available on one detailed page in VDO Fleet. This enables the efficient planning of the driver's week. VDO Fleet Maps also offers the opportunity to get the most out of every day.

High level of transparency

- / Based on the downloaded files and almost in real time, VDO Fleet shows the availability of the drivers in your fleet in a clearly arranged menu.
- / Keep track of remaining driving times, breaks and compensation times.
- / Avoid discussions with your drivers about fines and driving time violations.

VDO Fleet Driver Availability

Driver planning in compliance with the law

- / Simplified personnel planning with clear facts about driver availability.
- / Route plans for safe compliance with driving and rest times to avoid fines.
- / React proactively to possible delays or violations with real-time data instead of “after the fact”.

VDO FLEET PARTNER SOLUTIONS

Intelligent interfaces also make VDO Fleet Services eminently usable for mixed fleets and systems without standardized software.

With **VDO Fleet Connect** and **VDO Fleet Extract** data from third-party systems can be easily imported, processed or exported for all VDO Fleet Services.

With the **VDO Fleet Data Services** vehicle tachograph data is recorded, transmitted and made available in real time, optimizing fleet processes.

Intelligent interfaces

Import or export clean data sets from third-party systems for all VDO Fleet Services or prepare them.

Generate added value

- / Use our Tachograph Management solution together with your existing fleet telematics.
- / Import tachograph data into VDO Fleet Services via your server or fleet management system.
- / Ideal for fleet management providers who want to generate added value with the help of DTCO® data.

The data solutions of tomorrow

Fleet managers authorize third-party providers to integrate driver or vehicle data into their software solutions, e.g. accounting systems or payroll accounting.

VDO FLEET APP – THE MOBILE CONTROL CENTER

Thanks to the new VDO Fleet App, fleet managers always have an overview. The App brings key functions such as download reminders, local archiving, driver availability and VDO Fleet Maps directly to your smartphone – intuitively, securely and in real time.

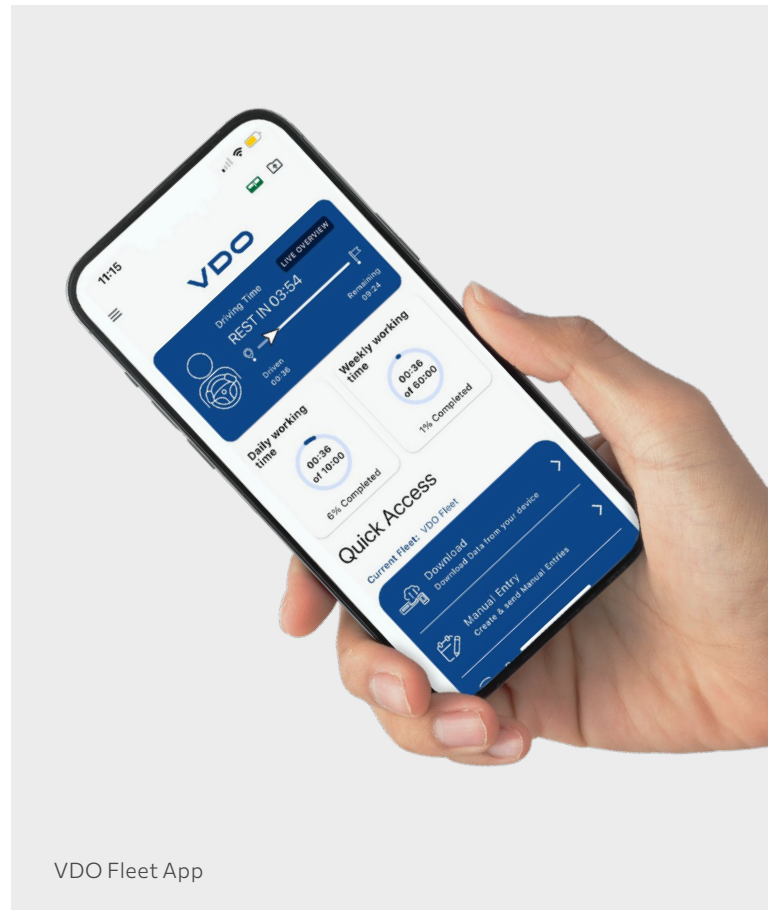

Thanks to the improved Bluetooth® interface, drivers can communicate directly with the digital tachograph via the App (DTCO® 4.1a and later). These functions are free of charge – they don't require a special login.

Free of charge for drivers

- / Typical processes such as loading/unloading, ferry trips and border crossings can be conveniently entered via smartphone.
- / Additional manual entries can be made directly in the app and transferred to the DTCO®.
- / Real-time overview of remaining driving and rest times, including automatic notifications to ensure compliance with legal requirements.

All booked VDO Fleet functions are also available in the App

- / Data download via Bluetooth® from the DTCO® 4.1a with upload to VDO Fleet.
- / Upload of tachograph data from the DLK Smart Download Key with an active Bluetooth® connection.
- / Reminders for mandatory driver and vehicle data downloads.
- / Track & Trace for all users of VDO Fleet Maps.
