SMART SOLUTIONS FOR SMART FLEETS

VDO LINK

Plug & Play telematics for tachograph data and more!

Make your fleet management smarter with a Plug & Play solution that automatically transfers vehicle and driver data to the VDO Cloud. No installation effort, no stress – just plug in, register and drive.*

Easy installation and high flexibility – easily switch between vehicles, no complex installation, just Plug & Play. Ideal for rental, leased or subcontracted vehicles.

Secure data archiving and 100 % compliance – automatically store tachograph data and easily comply with legal requirements.

Real-time tracking and optimized route planning – keep an eye on driving times, driver availability and vehicle locations at all times.

Secure cloud solution – GDPR-compliant data transfer and storage for easy archiving and audits.

Cost-effective alternative – all the benefits of a telematics solution without high hardware and installation costs.

SIMPLE. EFFICIENT. COMPLIANT.
Optimize your fleet management with **VDO Link and VDO Fleet Services –** the perfect add-on to your existing fleet management system or as stand-alone solution. Access modular services such as Remote Download, Track & Trace as well as real-time vehicle and driver data individually bookable per vehicle. Act now and benefit!

* Full functionality only in combination with VDO Fleet Services.
