

VDO LABEL PRINTER

Your advantages

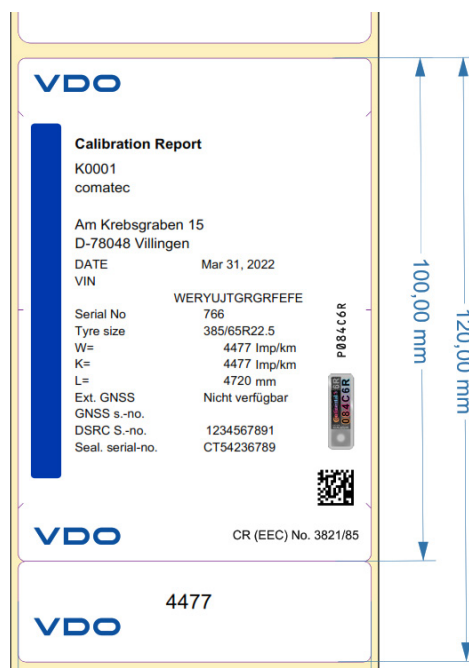

- / Direct printing of the installation label
- / Marking lasts for two years without additional protection
- / Flexible application
- / No paperwork thanks to online test reports
- / Easy handling and archiving
- / Easy to set up on the WorkshopTab

Technical features

Dimensions and specifications

Mains power supply:	100-240V AC
Consumption:	5W
Weight:	2,05 kg
Dimensions:	267 x 202 x 150.7 mm (length x width x height)
Protection class:	IP54
Operating temperature:	4,4°C - +41°C

The VDO Label Printer prints the installation label for the tachograph on a label provided for this purpose directly and uncomplicated. The annoying and sometimes tedious removal of the old label and the sealing foil are no longer necessary. The marking on the high-quality thermal transfer print lasts for at least two years, i.e. until the next inspection. The installation label can be adapted to the label to be printed, which makes the VDO Label Printer flexible and future-proof, e.g. in terms of possible QR code solutions.
