Optimise your fleet management with VDO Fleet

Discover VDO Fleet – **your all-in-one solution** for efficient fleet management. VDO Fleet helps you comply with legal requirements and manage your fleet in the best possible way.

Why VDO Fleet?

Boost time efficiency with automated remote downloads

- Save valuable working time by automating legally required data downloads.
- Transfer driver cards and tachograph downloads straight to your fleet management system.

Archiving and provision

- Archive tachograph and driver card downloads in a compliant manner.
- Simple overview to ensure a complete compliant download archive.
- Reminder function for pending tasks.
- Transparency about violations.

VDO Fleet Remote Download

VDO

Avoid fines

- Avoid receiving fines for infringements of driving/ rest periods and working time legislation.
- Benefit from transparency in terms of remaining driving hours, breaks and compensatory periods.

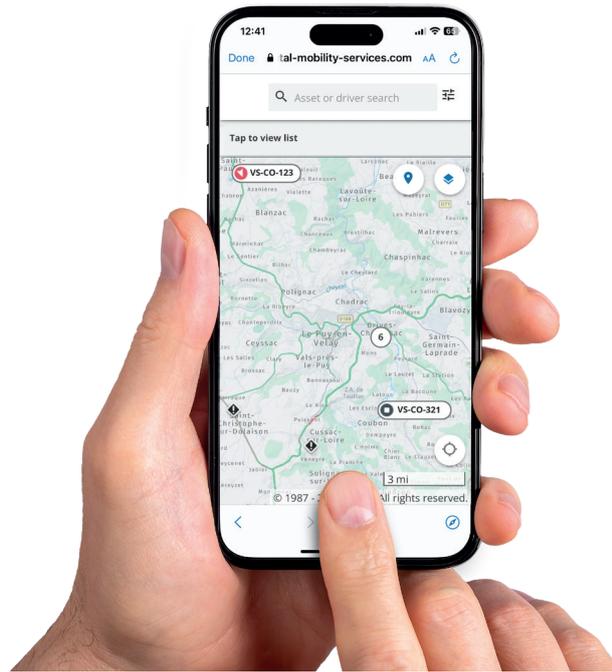

Driver training

- Identify problems and optimise driver performance through targeted training.

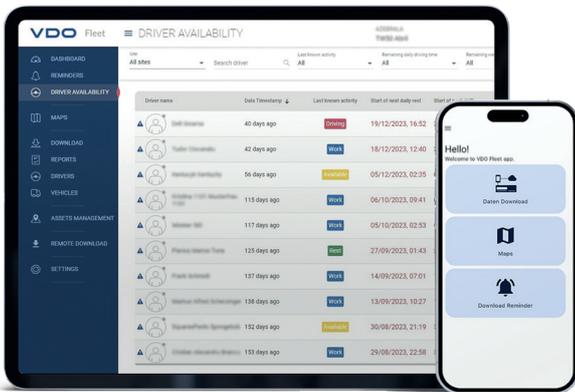

Real-time driver availability for more efficient scheduling

- Indicate delivery times more precisely thanks to real-time location data in VDO Fleet Maps.
- Record the start/destination address and mileage driven.
- Offer route plans that take your driving and rest periods into account.

VDO Fleet App

VDO Fleet Driver Availability and VDO Fleet App

Driver management with real-time data

- Monitor your fleet in real time.
- Receive intuitive information on your drivers' remaining driving times.
- Efficient planning and reporting to ensure compliance with statutory regulations and guidelines.
- Devise route plans that take driving and rest periods into account.

Increase the profitability of your fleet

- Make the most of stipulated and legal driver hours.
- Reduce empty runs and monitor engine idling.
- Use real-time data to respond proactively to potential delays and infringements.

Manage international journeys

- Meet the requirements of **EU Mobility Package I**.
- Analysis of border crossing data and reporting on loading/unloading events.

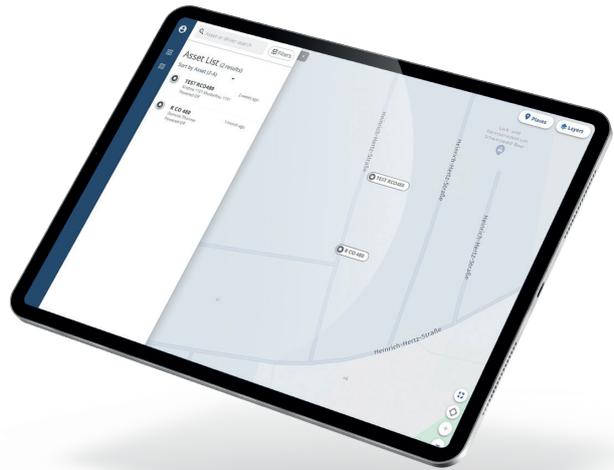

Maximum user-friendliness

- One platform, one login.
- All information in a single user interface.
- No switching between different tools.
- In-app support with updates and new products.

Your fleet on your smartphone

- Keep track of your fleet when you're on the go.
- Data updated every 30 seconds on your phone.
